MIZORAM PUBLIC SERVICE COMMISSION

COMPETITIVE EXAMINATION FOR RECRUITMENT TO THE POST OF ASSISTANT DIRECTOR (TOWN PLANNING) UNDER URBAN DEVELOPMENT & POVERTY ALLEVIATION DEPARTMENT, GOVERNMENT OF MIZORAM.

(FEBRUARY-2026)

TECHNICAL SUBJECT PAPER-II

Time Allowed : 2 hours FM : 100

All questions carry equal mark of 1 each.
Attempt all questions.

1. In the context of housing, 'Ghettoism' usually refers to:
(a) Unique lifestyles attributed to ethnic groups
(b) Social isolation or segregation of a specific group in a specific area
(c) Economical isolation or segregation of a specific group in a specific area
(d) Efficient transport planning

2. 'Affordable Housing' in the context of PMAY 2.0 is primarily targeted at:
(a) EWS
(b) EWS and LIG
(c) Industrial workers
(d) EWS, LIG & MIG

3. Which Five Year Plan first shifted focus from 'Government-built housing' to 'Enabler' where the state facilitates private and cooperative housing?
(a) 1st Five Year Plan
(b) 7th Five Year Plan
(c) 12th Five Year Plan
(d) 3rd Five Year Plan

4. 'Neighborhood Unit' concept was proposed by:
(a) FL Wright
(b) Clarence Perry
(c) Le Corbusier
(d) Pattrick Geddes

5. Radburn planning is best known for:
(a) Underpass for pedestrians
(b) Grid iron roads
(c) Separation of pedestrian and vehicular traffic
(d) State of the art Cul-de-sac

6. Large-scale state involvement in housing began mainly in:
(a) First Five Year Plan
(b) Second Five Year Plan
(c) Third Five Year Plan
(d) Eighth Five Year Plan

7. 'Housing for All' policy was formulated under:

(a) Twelfth Five Year Plan (b) Tenth Five Year Plan

(c) Eleventh Five Year Plan (d) NITI Aayog era

8. Slum improvement became a national focus during:

(a) First Plan (b) Sixth Five Year Plan

(c) Ninth Plan (d) Twelfth Plan

9. Which Indian city serves as a primary example of 'Sector-based' neighborhood planning?

(a) New Delhi (b) Chandigarh

(c) Varanasi (d) Kolkata

10. In housing 'Suitability Analysis,' which factor is considered a 'Constraint'?

(a) Proximity to jobs (b) High seismic risk or steep slopes

(c) Good groundwater (d) Low land price

11. The Habitat 67, a modular housing complex in Montreal is designed by:

(a) FL Wright (b) Le Corbusier

(c) Louis Kahn (d) Moshe Safdie

12. Broadacre City is associated with:

(a) FL Wright (b) Le Corbusier

(c) Clarence Stein (d) Ebenezer Howard

13. As new high-end housing is built, older units become available for lower-income groups. This is termed, in housing market as:

(a) Gentrification (b) Filtering process

(c) Affordability driver (d) De-gentrification

14. The 'Housing Backlinkage' to the economy includes:

(a) Demand for building materials (b) Demand for travel tourism

(c) Demand for social infrastructure (d) Demand for education

15. Identifying areas where there is high overcrowding, poor condition, or high rent-to-income ratios is termed as:

(a) Housing stress identification (b) Housing shortage identification

(c) Housing strata identification (d) Housing requirements identification

16. The 9th Five Year Plan was significant for housing because it introduced:

(a) The National Habitat Policy (b) Propagation of modern building materials

(c) The concept of high rise buildings (d) Housing For All (HFA)

17. Housing's macro-economic impact is strongest through:

(a) Inflation control and tax relaxation (b) Foreign exchange

(c) Multiplier effect on allied industries (d) Trade balance

18. Delhi's DDA housing layouts broadly follow:

(a) Grid model (b) Industrial model

(c) Neighborhood unit concept (d) Radburn model

19. The first national housing policy was formulated during:

(a) 3rd Five Year Plan
(b) 8th Five Year Plan
(c) 7th Five Year Plan
(d) 10th Five Year Plan

20. BSUP stands for:

(a) Basic Services to Urban Poor
(b) Basic Services to Uplift the Poor
(c) Benchmark Services to Urban Poor
(d) Bridging Services to Urban Poor

21. Building bye-laws primarily aim to ensure:

(a) Uniformity in design
(b) ULB revenue
(c) Safety, light & ventilation
(d) Land development control

22. Under the CLSS (Credit Linked Subsidy Scheme) vertical of PMAY-U, what is the maximum carpet area permitted for a house to be eligible under the MIG-II category?

(a) 110 sq. mt.
(b) 150 sq. mt.
(c) 200 sq. mt.
(d) 120 sq. mt.

23. HUDCO was primarily established to:

(a) Finance and regulate private real estate development in metropolitan cities
(b) Provide direct housing allotments to economically weaker sections
(c) Finance housing and urban infrastructure projects through institutional lending
(d) Prepare master plans for new towns and industrial townships

24. Which Indian scheme, launched under the NITI Aayog era, focuses on providing 'Rental Housing' complexes for migrant workers as a sub-scheme of PMAY-U?

(a) AMRUT
(b) ARHC
(c) HRIDAY
(d) DAY-NULM

25. In neighbourhood planning, the concept of defensible space primarily seeks to:

(a) Strengthen real-estate performance by improving territorial image and property upkeep
(b) Optimize development economics by minimizing shared circulation and service areas
(c) Promote resident territorial control and natural surveillance to discourage criminal activity
(d) Achieve compact urban form through spatial enclosure and higher plot utilization

26. Which factor MOST limits the replicability of the Radburn model in dense Indian cities?

(a) High land cost and fragmented land ownership
(b) Climatic incompatibility
(c) Cultural resistance to auto-intensive towns
(d) Lack of professional planners

27. The Stockholm Conference (1972) primarily focused on:

(a) Climate finance
(b) Urban housing
(c) Human environment protection
(d) Biodiversity trade

28. The Rio Earth Summit (1992) resulted in:

(a) Kyoto Protocol only
(b) Agenda 21
(c) Ramsar Convention
(d) Montreal Protocol

29. Air pollution dispersion models depend heavily on:

(a) Wind speed and direction
(b) Population density
(c) Rainfall data
(d) Building height

30. In urban environmental systems, The degree of disorder or degradation of energy and resources within the city is termed as:

(a) Enthalpy
(b) Entropy
(c) Urban metabolism
(d) Ecological falter

31. The most critical limitation of project-level EIA in urban planning is that it:

(a) Is too costly
(b) Is legally weak
(c) Fails to assess cumulative impacts of multiple projects
(d) Ignores public opinion

32. The DPSIR framework in environmental planning stands for:

(a) Development–Policy–System–Impact–Response
(b) Driving forces–Pressures–State–Impact–Response
(c) Demand–Population–Supply–Impact–Recovery
(d) Data–Planning–System–Impact–Regulation

33. In urban water quality management, BOD indicates:

(a) Toxicity level
(b) Salinity
(c) Organic pollution load
(d) Turbidity

34. Under the EIA Notification 2006, which authority is responsible for granting Environmental Clearance (EC) for 'Category B' projects?

(a) Ministry of Environment, Forest and Climate Change (MoEF&CC)
(b) State Environment Impact Assessment Authority (SEIAA)
(c) Central Pollution Control Board (CPCB)
(d) State Forest Department

35. The point beyond which irreversible ecological damage occurs in the environment may be termed as:

(a) Environmental carrying capacity
(b) Environmental climax
(c) Environmental Point of No Return (EPNoR)
(d) Environmental threshold

36. Agenda 21 is best interpreted in planning as:

(a) An enforceable international regulatory instrument
(b) A sector-specific environmental management code
(c) A financing mechanism for ecological restoration
(d) A multi-level framework for implementing sustainability actions

37. Urban flood vulnerability is determined primarily by:

(a) Drainage density and rainfall variability
(b) Land-use intensity and building coverage
(c) River morphology and catchment size
(d) Exposure, sensitivity, and adaptive capacity

38. In land suitability analysis, slope is considered mainly because it affects:

(a) Visual quality
(b) Construction feasibility
(c) Land ownership pattern
(d) Property taxation

39. The key difference between EIA and environmental auditing is that EIA is:

(a) Retrospective
(b) Voluntary
(c) Financial
(d) Predictive

40. Carrying capacity is reduced in urban areas mainly due to:

(a) Socio-cultural dynamism
(b) Administrative expansion
(c) Resource stress
(d) Political conflict

41. The objective of buffer zones is to:

(a) Maximize land use
(b) Demarcate areas
(c) Separate conflicts
(d) Improve connectivity

42. What is the daytime noise limit for a 'Silence Zone' in India?

(a) 45 dB
(b) 50 dB
(c) 55 dB
(d) 60 dB

43. Urban Heat Island effect is mitigated by high:

(a) Building density
(b) Thermal mass
(c) Surface albedo
(d) Pavement thickness

44. The 'Leopold Matrix' evaluates the:

(a) Economic ROI
(b) Impact interactions
(c) Population flux
(d) Traffic capacity

45. 'Terms of Reference' (ToR) in EIA are issued during:

(a) Screening
(b) Scoping
(c) Appraisal
(d) Public hearing

46. Life Cycle Assessment (LCA) is:

(a) Demographic study
(b) Cradle-to-grave
(c) Structural lifespan
(d) Health audit

47. Which source is classified as 'Renewable' in infrastructure planning?

(a) Shale Gas
(b) Anthracite
(c) Biomass
(d) Lignite

48. Subsidized low-cost housing is considered a 'merit good' because:

(a) It generates high profits for developers.
(b) It's a luxury item with high demand.
(c) It's socially desirable, improves quality of life, and creates positive externalities.
(d) It's solely for government employees.

49. As per the new earthquake-zoning map, India is divided in _____ seismic zones.

(a) Three
(b) Six
(c) Four
(d) Five

50. Which type of housing initiative is designed to provide safe accommodation to working women?

(a) Swadhar Greh scheme
(b) Beti Bachao Beti Padhao scheme
(c) Working woman hostel scheme
(d) One Stop Centre scheme

51. As per UN-Habitat, slum household lacks the following:

1) Durable Housing & Sufficient Living Space
2) Access to Safe Water & Sanitation
3) Security of Tenure

Which of the following is true?

(a) 1 & 2
(b) 2 & 3
(c) 1, 2 & 3
(d) None

52. What is meant by Ryotwari System?

(a) Direct revenue payment from registered owner to government
(b) Revenue collected by zamindars
(c) Land valuation system
(d) Housing fee collection system

53. Landmark initiatives pronounced with National Housing & Habitat Policy,1998 are:

(a) Involvement of one type-stakeholder
(b) Repeal of Urban Land Ceiling Act
(c) Not Permitting Foreign Direct Investment in housing
(d) Avoid real estate development

54. Slum Free City Plan of Action is part of

(a) RAY
(b) IAY
(c) PMAY
(d) IHSDP

55. Match the Parts of Residential Buildings in Group-I with their respective minimum width (in m) in Group-II as per the National Building Code 2016.

A	Habitable room	**1**	1.0 m
B	Stair flight	**2**	3.0 m
C	Kitchen	**3**	1.2 m
D	Bathroom	**4**	1.8 m
		5	2.4 m

(a) A-2, B-1, C-5, D-3
(b) A-5, B-3, C-4, D-1
(c) A-2, B-3, C-5, D-4
(d) A-5, B-1, C-4, D-3

56. Data on 'households with one or more married couples sharing a room with a person aged 12 years or more' is used for computing:

(a) House density
(b) Housing shortage
(c) Housing price
(d) Housing affordability

57. Which of the following is NOT a factor that contributes to a housing shortage?

(a) Limited flat land
(b) Competing land use
(c) Low birth rates
(d) Rural-urban migration

58. Housing shortage is present when there is insufficient housing to accommodate the population in an area, which means:

(a) The price is below the equilibrium rent, causing a surplus.
(b) The quantity demanded exceeds the quantity supplied at a given price point.
(c) The market has a 4% vacancy rate.
(d) All available houses are "katcha" (non-durable)

59. What is the current implementation period for PMAY-U 2.0 ?

(a) 2022–2027
(b) 2024–2029
(c) 2025–2030
(d) 2020–2025

60. Under PMAY-U 2.0, what is the annual income limit for the Economically Weaker Section (EWS) category?

(a) Up to ₹3 Lakh
(b) ₹3.5 Lakh to ₹6 Lakh
(c) ₹3 Lakh to ₹6 Lakh
(d) Up to ₹3.5 Lakh

61. Which component of PMAY-U is implemented as a 'Central Sector Scheme'?

(a) In-situ Slum Redevelopment
(b) Affordable Housing in Partnership
(c) Credit Linked Subsidy Scheme (CLSS)
(d) Beneficiary-led Construction

62. Tenure is classified in to:

(a) Free hold, Lease hold, Rental
(b) Free venture, Joint Venture
(c) Fixed grip, non -fixed grip,
(d) Rent, lease

63. What is the population of a smallest planning unit conceived as Housing Area with convenience shopping, open area, Anganwadi and milk booth as minimum infrastructure provision?

(a) 4000 (b) 5000

(c) 6000 (d) 7000

64. How many local parks and playgrounds should be provided in a neighbourhood as per URDPFI?

(a) 1-2 (b) 2-3

(c) 3-4 (d) 2 only

65. A healthy and growing housing sector is a key indicator for macroeconomic stability and growth because it directly influences the national figure of:

(a) Consumer Price Index (CPI) weight assigned to luxury goods

(b) The national budget deficit

(c) The balance of payments

(d) Gross Domestic Product (GDP) and employment rates

66. Which of the following is typically NOT a major objective of incorporating housing into a city's master plan?

(a) Promoting social equity and inclusivity

(b) Ensuring adequate and affordable housing for all

(c) Maximizing land value through luxury developments only

(d) Addressing housing shortages and preventing slum formation

67. In the context of a Zonal Development Plan, which standard related to housing is commonly specified?

(a) Traffic density (b) Energy density

(c) Building density (d) Vegetation density

68. Special provisions are often made in a master plan to accommodate growing populations. These commonly include strategies for:

(a) Limiting urban expansion to reduce population density

(b) Focusing exclusively on rural housing development

(c) Affordable housing and slum redevelopment

(d) Banning private sector participation in housing

69. What is the mandatory registration requirement under RERA?

(a) All residential projects (b) Projects over 500 sqm

(c) Projects with more than 8 apartments (d) Both a and b

70. Which of the following is considered a key element of neighborhood living in a traditional society?

(a) Impersonal relationships and social distance

(b) High social and occupational mobility

(c) A strong sense of community sentiment and shared identity

(d) Focus on individual achievements and a lack of social hierarchy

71. Which Constitutional Amendment removed the right to property from Fundamental Rights?

(a) First Amendment (b) Twenty-Fifth Amendment

(c) Forty-Fourth Amendment (d) Forty-Second Amendment

72. Area of a neighbourhood according to C. Perry will be around:

(a) 1600 acres (b) 2600 acres

(c) 3600 acres (d) 160 acres

73. The concepts of 'serial vision', 'punctuation' and 'closure' were proposed by:

(a) Le Corbusier (b) Kevin Lynch

(c) Louis I Kahn (d) Gordon Cullen

74. One hectare of biologically productive space with world average productivity is:

(a) An imperial hectare (b) A global hectare

(c) A world hectare (d) A continental hectare

75. Which convention is called the Convention on Wetlands?

(a) Vienna Convention (b) Bonn Convention

(c) Ramsar Convention (d) Stockholm Convention

76. An international protocol to reduce greenhouse gas emissions:

(a) Kyoto Protocol (b) Montreal Protocol

(c) Cartagena Protocol (d) Nagoya Protocol

77. The 'heat island' effect in cities is largely caused by:

(a) Increased tree planting

(b) Concretization and heavy vehicular traffic

(c) Lowering of industrial output

(d) Natural cooling processes

78. Study of inter-relationship between organisms and their environment is called

(a) Ecology (b) Ecosystem

(c) Phytogeography (d) Ethology

79. The environment which has been modified by human activities is called:

(a) Natural environment (b) Anthropogenic environment

(c) Modem environment (d) Urban environment

80. Environment Impact Assessment in India is statutorily backed by:

(a) Wildlife (Protection) Act, 1972 (b) Forest (Conservation) Act, 1980

(c) Environment Protection Act, 1986 (d) Biological Diversity Act, 2002

81. After 2006 Amendment the EIA cycle comprises of four stages:

(a) Screening, Impact prediction, Public hearing, Appraisal

(b) Screening, Collection of baseline data, Risk assessment, Appraisal

(c) Screening, Impact prediction, Mitigation measures, EIA report

(d) Screening, Scoping, Public hearing, Appraisal

82. Hydel-power plants produce energy that is considered:

(a) Polluting and non-renewable (b) Non-polluting and renewable

(c) Polluting and renewable (d) Non-polluting and non-renewable

83. What is an anti-forest conservation activity?

(a) Afforestation
(b) Preservation of wild animals
(c) Clear-felling
(d) Economy in lumbering

84. Which of the following is NOT a standard parameter to assess the drinking water quality?

(a) Total coliforms
(b) E.coli
(c) Turbidity
(d) Methane concentration

85. Zero energy buildings are defined as:

(a) Buildings that produce as much energy as they consume over a full year
(b) Buildings that do not consume any energy
(c) Special building that get free energy through Govt of India
(d) Buildings that use renewable energy for at least 25% of their basic needs

86. What is an isogram on a map?

(a) A point representing the unique value of a quantity in an area
(b) A line representing the difference in elevation in two areas
(c) A line representing an equal value of a given quantity
(d) An area representing a range of temperatures

87. As per IS, what is the permissible exposure limits for noise in commercial zone during daytime?

(a) 50 dBA
(b) 55 dBA
(c) 65 dBA
(d) 75 dBA

88. Which one is not the benefit of environmental assessment?

(a) Reduced cost and time of project implementation
(b) Cost-saving modiûcations in project design
(c) Increase project acceptance
(d) Increase cost of treatment and clean up

89. Biological Magnification is:

(a) Decrease in concentration with trophic level
(b) Increase in concentration with trophic level
(c) Equilibrium in concentration
(d) Magnifcation with time

90. Besides the hydrological (water) cycle and the biogeochemical (nutrient) cycle what are the other two important ecological processes?

(a) Energy flow and growth cycles
(b) Community dynamics and growth cycles
(c) Energy flow and community dynamics
(d) Carbon and nitrogen cycles

91. Concepts of carrying capacity of an eco-system is introduced by:

(a) Lewis Mumford
(b) Constantine Doxiadis
(c) Patric Abercrombie
(d) Thomas Malthus

92. What is the main concern with 'microbeads'**?**

(a) Cause skin cancer in children.
(b) Used as food adulterants.
(c) Harmful to marine ecosystems.
(d) Absorbed by crop plants.

93. Which of these is NOT a component of an Environmental Management System (EMS) based on ISO 14001?

(a) Environmental policy
(b) Resource use, emissions, waste
(c) Financial projections
(d) Management review

94. Which of the following pollutants is a major contributor to acid rain?

(a) Carbon dioxide
(b) Sulphur dioxide
(c) Methane
(d) Oxygen

95. Which of the following is an example of a point source pollution?

(a) Agricultural runoff
(b) Factory smokestack emissions
(c) Ocean currents
(d) Wind erosion

96. Standards for emission or discharge of environmental pollutants is set by:

(a) The Environment (Protection) Rules, 1986
(b) The Water Act (2000)
(c) Environment (Protection) Act, 1986
(d) Environment (Protection) Act, 2000

97. Which country is widely recognized as the world leader in cycling infrastructure?

(a) USA
(b) China
(c) Norway
(d) Netherlands

98. What does SDG 13 focus on?

(a) Life Below Water
(b) Climate Action
(c) Peace and Justice
(d) Gender Equality

99. A project that starts from scratch on unused land or in a new environment is called:

(a) Brownfield development
(b) Infill development
(c) Greenfield development
(d) Redevelopment

100. Which among the following is a framework for disaster risk reduction under the United Nations?

(a) Nagoya Framework
(b) Sendai Framework
(c) Geneva Framework
(d) Chiang Mai Framework
