MIZORAM PUBLIC SERVICE COMMISSION

COMPETITIVE EXAMINATION (COMBINED TECHNICAL) FOR RECRUITMENT TO THE POSTS OF AGRICULTURE & ALLIED SERVICES, GOVERNMENT OF MIZORAM.

(NOVEMBER-2025)

AH & VETY PAPER-I

Time Allowed : 3 hours FM : 200

SECTION - A *(Multiple Choice questions) (100 Marks)*

All questions carry equal mark of 2 each. Attempt all questions.

*This Section should be answered only on the **OMR Response Sheet** provided.*

Notes regarding Negative Marking :

(i) There will be penalty (negative marking) for every wrong answer given by a candidate in the MCQ type questions.

(ii) For each question for which a wrong answer has been given by the candidate, one-third of the marks assigned to that question will be deducted as penalty

(iii) If a candidate gives more than one answer to one question, it will be treated as a wrong answer even if any one of the given answers happens to be correct and there will be same penalty as above for that question.

(iv) If a question is left blank, i.e., no answer is given by the candidate, there will be no penalty for that question.

---

1. The silent heat in buffalo is very common during:

(a) Summer (b) Winter

(c) Spring (d) All of the above

2. Roman nose is a characteristic feature of:

(a) Surti (b) Jamunapari

(c) Sirohi (d) Chegu

3. Bull nose ring should be applied at the age of:

(a) 5 months (b) 12 months

(c) 20 months (d) 36 months

4. The milking of a dairy cow should be completed within:

(a) 5 minutes (b) 7 minutes

(c) 10 minutes (d) 15 minutes

5. Which one of the following gives the calf mortality and adult mortality at a well-managed dairy farm?

(a) Calves less than 5% and adults less than 5%

(b) Calves less than 5% and adults less than 10%

(c) Calves less than 10% and adults less than 10%

(d) Calves less than 10% and adults less than 5%

6. The homestead should be located on the _____ side of the farm buildings, considering the direction of winds.

(a) windward (b) leeward

(c) upward (d) downward

7. The time between successful conception to parturition is known as:

(a) Service period (b) Calving index

(c) Dry period (d) Gestation period

8. Fluid preparations given or introduced through the rectum are known as:

(a) Bolus (b) Drenching

(c) Enema (d) Electuaries

9. A cradle is a device to prevent:

(a) Kicking (b) Wind suckling

(c) Eye rolling (d) Self suckling

10. In the electrical method of disbudding, the temperature of the instrument should be:

(a) 500°F (b) 700°F

(c) 1000°F (d) 2000°F

11. The ability of a given gene or gene combination to be expressed phenotypically to any degree:

(a) Penetrance (b) Expressivity

(c) Pleiotropism (d) Prepotency

12. Crossing over takes place at:

(a) Mitosis (b) Meiosis I

(c) Meiosis II (d) All of the above

13. The chromosome number of the domestic pig is:

(a) 38 (b) 54

(c) 62 (d) 78

14. The theory of epigenesis was proposed by:

(a) K.F. Wolf (b) Charles Darwin

(c) Swammerdam (d) Kollikerasas

15. If the number of multiple alleles for a trait is 5, then the total number of genotypes is:

(a) 9 (b) 16

(c) 12 (d) 15

16. Heritability in the narrow sense is:

(a) VA/VP (b) VE/VP

(c) VG/VP (d) VA+VG/VP

17. A new breed can be evolved by:

(a) Out-crossing (b) Cross-breeding

(c) Grading-up (d) None of the above

18. The proportion of the population that shows genetic death is:

(a) Genetic sterility (b) Genetic linkage

(c) Genetic load (d) Genetic drift

19. The most effective method of selection is:

(a) Mass selection (b) Pedigree selection

(c) Progeny testing (d) Selection index

20. If the coefficient of selection is 0.25, then the fitness is:

(a) 1 (b) 0.25

(c) 0.75 (d) 0.5

21. Among the following, the most abundant mineral in plants is:

(a) Calcium (b) Phosphorus

(c) Potassium (d) Magnesium

22. The DCP% (DM basis) in non-maintenance type of roughage is:

(a) 3-5 % DCP (b) Below 3 % DCP

(c) Above 5 % DCP (d) None of the above

23. The fodder best suited for making hay with high-energy content among the following is:

(a) Cowpea (b) Oat

(c) Maize (d) Napier

24. Respiratory quotient (RQ) of fat is:

(a) 1.0 (b) 0.7-1.0

(c) 0.7 (d) 1.5

25. In poultry feed, methionine is the only limiting amino acid in:

(a) Sesame cake (b) Soybean meal

(c) Sorghum meal (d) Wheat meal

26. The requirement of iron for a rapidly growing young piglet per day is around:

(a) 7–16 mg (b) 17-26 mg

(c) 27-39 (d) 40-44 mg

27. 'Penguin-like squat' in hens is due to a deficiency of:

(a) Magnesium (b) Potassium

(c) Calcium (d) Sodium

28. The species that is most susceptible to salt poisoning is:

(a) Rabbit (b) Cattle

(c) Horse (d) Swine

29. The enzyme required for the synthesis of Vitamin C within the body of an animal is:

(a) Superoxide dismutase (b) L-gulonolactone oxidase

(c) Catalase (d) None of the above

30. As per BIS-2007, a broiler finisher diet should contain a minimum CP of:

(a) 18% (b) 20 %

(c) 23% (d) 25%

31. The objective and subjective components of the believability of a source or message is termed as:

(a) Tractability (b) Worthiness

(c) Credibility (d) Reliability

32. Which of the following is not an element of diffusion?

(a) Adoption (b) Social system

(c) Communication channels (d) Over time

33. The functional relationship between output and total cost is:

(a) Average Cost (b) Cost function

(c) Fixed Cost (d) None of the above

34. The graphical representation of the demand schedule is:

(a) Demand curve (b) Demand Schedule

(c) Demand function (d) None of the above

35. The feature of rural society is:

(a) Formal relationship (b) Face-to-face interaction

(c) High-density population (d) Dynamic lifestyle

36. A network that extends over a large geographical area, such as states or countries:

(a) PAN (b) WAN

(c) LAN (d) MAN

37. Which is not a type of Entrepreneur?

(a) Innovative (b) Fabian

(c) Drone (d) Influencer

38. A business that is chartered or registered by the state and that operates separately from the owner or owners is termed as:

(a) Public Limited Company (b) Private Company

(c) Corporation (d) Cooperatives

39. The sub-mission of the National Livestock Mission includes:

(a) Breed Development of Livestock and Poultry

(b) Feed and Fodder Development

(c) Innovation and Extension

(d) All of the above

40. Operation flood was launched in:

(a) 1968 (b) 1974

(c) 1970 (d) 1978

41. The greenish-yellow color of whey is due to:

(a) Niacin (b) Folic acid

(c) Riboflavin (d) None of the above

42. HTST pasteurization heats milk to about:

(a) 72°C for 10 seconds (b) 72°C for 15 seconds

(c) 72°C for 20 seconds (d) None of the above

43. The primary hormone that stimulates the synthesis of casein is:

(a) Insulin (b) Prolactin

(c) Cortisol (d) None of the above

44. Blood meal is rich in the amino acid:

(a) Threonine (b) Lysine

(c) Alanine (d) None of the above

45. Troponin C has affinity for:

(a) Calcium (b) Potassium

(c) Sodium (d) None of the above

46. India's meat production for the 2023-24 fiscal year was:

(a) 8.50 million tonnes (b) 10.25 million tonnes

(c) 13.75 million tonnes (d) None of the above

47. The ritual method of slaughter in the Hindu religion is:

(a) Halal (b) Kosher

(c) Jhatka (d) None of the above

48. Which is not a method for the treatment of condemned meat and carcasses?

(a) Incineration (b) Burial

(c) Rendering (d) None of the above

49. The process of breaking milk fat globules is termed:

(a) Centrifugation (b) Microfiltration

(c) Homogenization (d) None of the above

50. Which of the following governs the safety and quality of processed meat products in India?

(a) Food Safety and Standards Authority of India

(b) Meat Food Products Order, 1973

(c) Food Safety and Standards Act, 2006

(d) None of the above

SECTION - B *(Conventional Type) (100 Marks)*

*This Section should be answered only on the **Answer Sheet** provided.*
Marks for each question is indicated against it.
*Attempt **any 5 (Five)** questions.*

1. Define a vice. Describe the common vices and their preventive measures in horses and cattle. **(2+8+10=20)**

2. What do you mean by animal restraining? Describe the different physical restraining methods in farm animals. **(4+16=20)**

3. What is inbreeding? Write the genetic and phenotypic consequences of inbreeding. Enumerate the applications of inbreeding. **(2+10+8=20)**

4. What is a feed additive? Classify the feed additives, providing at least three examples for each group. Enumerate the advantages and disadvantages of antibiotics as feed additives in the ration of poultry and swine. **(2+10+8=20)**

5. What is meant by feeding standard? Describe different feeding standards for livestock. **(4+16=20)**

6. Enumerate different types of communication. Describe the elements and barriers of communication. **(6+6+8=20)**

7. What do you mean by meat processing? Describe modern processing techniques in the comminution of meat. **(4+16=20)**

8. Describe the common defects of milk products and their remedial measures. **(8+12=20)**
