MIZORAM PUBLIC SERVICE COMMISSION

COMPETITIVE EXAMINATION (COMBINED TECHNICAL) FOR RECRUITMENT TO THE POSTS OF AGRICULTURE & ALLIED SERVICES, GOVERNMENT OF MIZORAM.

(NOVEMBER-2025)

AH&VETY PAPER-III

Time Allowed : 3 hours FM : 200

SECTION - A *(Multiple Choice questions) (100 Marks)*

All questions carry equal mark of 2 each. Attempt all questions.

*This Section should be answered only on the **OMR Response Sheet** provided.*

Notes regarding Negative Marking :

(i) There will be penalty (negative marking) for every wrong answer given by a candidate in the MCQ type questions.

(ii) For each question for which a wrong answer has been given by the candidate, one-third of the marks assigned to that question will be deducted as penalty

(iii) If a candidate gives more than one answer to one question, it will be treated as a wrong answer even if any one of the given answers happens to be correct and there will be same penalty as above for that question.

(iv) If a question is left blank, i.e., no answer is given by the candidate, there will be no penalty for that question.

---

1. Largest sinus in the head of horse is _____.

(a) Sphenoid sinus (b) Palantine sinus

(c) Frontal sinus (d) Maxillary sinus

2. Cyanide poisoning in animals results in _____ type of anoxia.

(a) anoxic (b) cytotoxic

(c) anaemic (d) circulatory

3. Castration cells are present in _____.

(a) testes (b) anterior pituitary

(c) hypothalamus (d) uterus

4. Weaver finch feather test is done for _____.

(a) luteinizing hormone (b) progesterone

(c) follicle stimulating hormone (d) prolactin

5. The most potent local anaesthetic among the following is _____.

(a) lidocaine (b) procaine

(c) bupivacaine (d) prilocaine

6. Lumpy skin disease in cattle is caused by _____.

(a) Parapox virus (b) Capripox virus

(c) Herpes virus (d) Vaccinia virus

7. FAMACHA score card is used for the management of _____ infection in sheep and goats.

(a) *Haemonchus* (b) *Capillaria*

(c) *Ostertagia* (d) *Trichostrongylus*

8. The major vector for African swine fever in pigs is _____.

(a) *Culex* (b) *Stomoxys*

(c) *Culicoides* (d) *Ornithodorous*

9. A non-selective H1 anti-histamine among the following is _____.

(a) Chlorpheniramine (b) Promethazine

(c) Cetirizine (d) Diphenhydramine

10. 'Bull Nose'in pigs is caused by _____ spp.

(a) *Haemophilus* (b) *Clostridium*

(c) *Fusobacterium* (d) *Bacillus*

11. Brainstem auditory evoked response (BAER) test is done for _____ nerve.

(a) trochlear (b) vestibulocochlear

(c) facial (d) occulomotor

12. 'Papple shaped abdomen' in bovines is a characteristic of _____.

(a) abomasal displacement (b) vagus indigestion

(c) ruminal impaction (d) tympany

13. Traumatic suture needles are used for suturing _____.

(a) oesophagus (b) rumen

(c) peritoneum (d) skin and fascia

14. 'Arthropathy' is one of the side effects of _____.

(a) fluroquinolones (b) aminoglycosides

(c) cephalosporins (d) sulfonamides

15. Histologic classification of placenta of pig is _____.

(a) haemochorial (b) syndesmochorial

(c) haemoendothelial (d) epitheliochorial

16. Foetal membrane in which the earliest blood forming cells appear is _____.

(a) amnion (b) yolk sac

(c) chorion (d) allantois

17. A cholinergic drug that is used for the management of ruminal atony is _____.

(a) Methacholine (b) Acetylcholine

(c) Carbachol (d) Nor-adrenaline

18. Hypotonic dehydration occurs in _____.

(a) copious sweating (b) nephrosis

(c) enterotoxigenic collibacilllosis (d) water deprivation

19. 'Blue eye' condition in dogs is associated with _____.

(a) Rubarth disease (b) Carre's disease

(c) Canine leptospirosis (d) Canine babesiosis

20. Enzootic ataxia in sheep is mainly noticed in _____.

(a) Weaned lambs (b) Unweaned lambs

(c) Adult animals (d) Pregnant animals

21. 'Punishment for false evidence' comes under Section _____of the Indian Penal Code.

(a) 377 (b) 428

(c) 272 (d) 193

22. Crazy chick disease in poultry is caused due to the deficiency of _____.

(a) Vitamin D (b) Vitamin A

(c) Thiamine (d) Vitamin E

23. Tapetum lucidum of eye is associated with _____.

(a) cornea (b) scelera

(c) iris (d) choroid

24. _____ is an example for potassium sparing diuretic.

(a) Spiranalactone (b) Frusemide

(c) Torsemide (d) Mannitol

25. The dose rate of vincristine for the management of canine transmissible veneral tumor is _____.

(a) 0.25 mg/kg (b) 0.025 mg/kg

(c) 2.5 mg/kg (d) 25 mg/kg

26. Scythe-shaped spleen is present in _____.

(a) dog (b) pig

(c) horse (d) ox

27. _____ is an example of lipotropic factor.

(a) Cysteine (b) Choline

(c) Riboflavin (d) alpha-glycerophosphate

28. 'Colopexy' surgical technique is used for the management of _____.

(a) inflammatory bowel disease (b) recurrent rectal prolapse

(c) constipation (d) colon tumours

29. Incompatible blood transfusion is an example for _____ of hypersensitivity reaction.

(a) Type I (b) Type II

(c) Type III (d) Type IV

30. Damage to _____ nerve causes roaring in equines.

(a) recurrent laryngeal (b) glossopharyngeal

(c) vagus (d) accessory

31. Mucosa of urinary bladder is lined by _____ epithelium.

(a) simple squamous (b) stratified

(c) transitional (d) simple cuboidal

32. The foramen magnum is present in _____ bone.

(a) occipital (b) parietal

(c) temporal (d) frontal

33. Ovulation in cattle occurs during _____.

(a) proestrus (b) estrus

(c) metestrus (d) diestrus

34. An induced ovulator among the following is _____.

(a) bovine (b) canine

(c) ovine (d) feline

35. _____ is considered as gold standard treatment for urethral obstruction in Veterinary case.

(a) Perineal urethrostomy (b) Tube cystotomy

(c) Urethrotomy (d) Urinary bladder marsupialisation

36. Hard Pad disease is also known as:

(a) Canine Distemper (b) Blue ear disease

(c) Parvoviral Infection (d) Swine fever

37. _____ (species) is generally considered as resistant to foot and mouth disease.

(a) Ovine (d) Swine

(c) Equine (d) Canine

38. _____ is a nuclear sperm defect.

(a) Distal droplet (b) Cork screw sperm

(c) Diadem sperm (d) Dag's defect

39. Testicular descent occurs at last quarter of foetal life in _____.

(a) boar (b) ram

(c) buck (d) stallion

40. Fredet Ramstedt operation is performed for _____.

(a) gastric dilatation and volvulus (b) gastric ulcer

(c) pyloric stenosis (d) gastric tumour

41. _____ (species) is the most sensitive to xylazine.

(a) Dog (b) Cat

(c) Cattle (d) Horse

42. _____ is the best incision site for removing foetus from uterus during caesarean section in dogs.

(a) Body of uterus
(b) Tip of uterine horn
(c) Centre of uterine horn
(d) Cervix

43. _____ pin is used most frequently in veterinary orthopaedics.

(a) Sherman
(b) Threaded
(c) Steinman
(d) Rush

44. Radiographic confirmation of pregnancy in bitch is possible as early as _____.

(a) 20-25 days of gestation
(b) 55-60 days of gestation
(c) 42-45 days of gestation
(d) 10-20 days of gestation

45. The highest concentration of inositol is found in the semen of _____.

(a) bull
(b) boar
(c) ram
(d) buck

46. Tarsorrhaphy refers to suturing of _____.

(a) eye ball
(b) tarsal gland
(c) eyelid
(d) tendon

47. N-acetylcysteine is an anti-dote for _____ toxicity.

(a) Acetaminophen
(b) Ivermectin
(c) Xylazine
(d) Warfarin

48. Phalangeal exostosis is known as _____.

(a) splint bone
(b) spavin
(c) ring bone
(d) side bone

49. Intussusception occurs most commonly in _____.

(a) duodenum
(b) rectum
(c) colon
(d) ileum

50. The rate of fluid administration of isotonic crystalloid fluids during hypovolemic shock in dogs is _____.

(a) 10-20 mL/kg/hr
(b) 40 mL/kg/hr
(c) 90 mL/kg/hr
(d) 60 mL/kg/hr

SECTION - B *(Conventional Type) (100 Marks)*

*This Section should be answered only on the **Answer Sheet** provided.*
Marks for each question is indicated against it.
*Attempt **any 5 (five)** questions.*

1. Write the etio-pathogenesis, clinical manifestations, diagnosis, differential diagnosis, treatment and prevention of porcine reproductive and respiratory syndrome (PRRS) in pigs. **(20)**

2. Write the etiology, pathophysiology and management of acute kidney injury (AKI) and chronic kidney disease (CKD) in dogs. **(20)**

3. Mention the principles of treatment in cases of poisoning. Describe the management of cyanide and ivermectin toxicity in animals. **(20)**

4. Describe etiology and classification of fracture along with fracture healing process and various methods of immobilization. **(20)**

5. Define wound and give its classification, and describe process, factors affecting, and complications of wound healing. **(20)**

6. Define brachial plexus. Enlist various branches of brachial plexus with their innervation. Describe the course of radial and ulnar nerves with their clinical significance. **(20)**

7. Define dystocia. Classify the causes of dystocia in domestic animals. Write in detail about mutation techniques. **(20)**

8. Define infertility. Classify different forms of infertility. Write in detail about non-infectious causes of infertility in domestic animals. **(20)**
