MIZORAM PUBLIC SERVICE COMMISSION

COMPETITIVE EXAMINATION FOR CHILD DEVELOPMENT PROJECT OFFICER (CDPO) UNDER SOCIAL WELFARE, WOMEN & CHILD DEVELOPMENT DEPARTMENT, GOVERNMENT OF MIZORAM. (NOVEMBER, 2025)

HOME SCIENCE SUBJECT
(TECHNICAL PAPER-II)

Time Allowed : 3 hours FM : 200

SECTION - A *(Conventional Type)(100 Marks)*

This Section should be answered only on the Answer Sheet provided.
Marks for each question is indicated against it. Attempt all questions.

1. What do you mean by meal planning? Explain the principles of meal planning. What are the steps involved in planning a balanced diet? **(2+4+4=10)**

2. Explain the advantages of cooking food and how different cooking methods affect its nutritional quality. Differentiate between natural and artificial methods of food preservation with examples. **(3+4+3=10)**

3. What do you mean by the term 'carbohydrates?' Explain in detail how carbohydrates are classified. **(2+8=10)**

4. Describe the causes and clinical features of vitamin-A deficiency. What are the good food sources of Vitamin-A? **(4+4+2=10)**

5. What are the factors affecting BMR? Discuss the role of sodium and potassium in maintaining electrolyte and water balance. How can diet therapy help in the prevention of malnutrition and deficiency diseases? **(4+3+3=10)**

6. What are the factors to be considered in planning therapeutic diets? Write on tube feeding and intravenous feeding. **(4+3+3=10)**

7. Write the objectives of ICDS program. Mention the National and International agencies working towards foods and nutrition. What are the various schemes relating to maternal nutrition and health? **(4+3+3=10)**

8. Explain the reasons for increased nutrient requirement during pregnancy. Discuss the general dietary problems of pregnancy. **(5+5=10)**

9. What are the objectives and functions of National Institute of Public Cooperation and Child Development? (NIPCCD) **(10)**

10. Discuss the strategies implemented by the Government for the prevention of nutritional anaemia. **(10)**

SECTION - B *(Multiple Choice questions) (100 Marks)*

All questions carry equal mark of 2 each. Attempt all questions.
*This Section should be answered only on the **OMR Response Sheet** provided.*

1. Definition of nutrition is:
(a) The process of cooking nutritious food
(b) The process by which the body uses nutrients from food for growth and maintenance
(c) The amount of food consumed in a day for good health
(d) The food which provides materials for tissue building

2. Vitamin A,D,E,K are known as:
(a) Water soluble
(b) Lipids
(c) Fat soluble
(d) Minerals

3. Deficiency of which nutrient can lead to anaemia?
(a) Calcium
(b) Iron
(c) Vitamin A
(d) Sodium

4. Moist-heat cooking method is:
(a) Roasting
(b) Boiling
(c) Grilling
(d) Baking

5. Salt is supplemented by:
(a) Magnesium glycinate
(b) Lithium iodide
(c) Potassium iodide
(d) Sodium bicarbonate

6. Kneaded dough left in the refrigerator show gray or black specks due to the activity of:
(a) Psychrophilic bacteria
(b) Mesophilic bacteria
(c) Thermophilic bacteria
(d) Thermophiles

7. Yeast fermentation produces chemical changes in which enzymes produced by the yeast cells converts:
(a) Alcohol to sugar
(b) Sugar into alcohol
(c) Proteins into amino acids
(d) Fats into fatty acids

8. Egg whites coagulate at:
(a) 40-42ºC
(b) 50-52ºC
(c) 60-62ºC
(d) 70-72ºC

9. Sodium nitrite is used for curing and pickling:
(a) Green leafy vegetables
(b) Root vegetables
(c) Fruits
(d) Meat

10. Pancakes are prepared by:
(a) Sauteing
(b) Deep frying
(c) Shallow frying
(d) Stir frying

11. It is also known as the 'appetite vitamin':
(a) Riboflavin
(b) Vitamin C
(c) Thiamine
(d) Niacin

12. Haemoglobin is a:

(a) Simple protein (b) Derived protein

(c) Conjugated protein (d) Hydrolyzed protein

13. An example of an essential fatty acid is:

(a) Linoleic acid (b) Oleic acid

(c) Palmitic acid (d) Lauric acid

14. Angular stomatitis occurs due to deficiency of:

(a) Riboflavin (b) Calcium

(c) Proteins (d) Iodine

15. Hypercalcemia means:

(a) Excess of phosphorus and vitamin A (b) Excess of calcium and Vitamin C

(c) Excess of calcium and Vitamin D (d) Excess of magnesium only

16. Nutrients which are essential for bone growth in children:

(a) Vitamin D and calcium (b) Iron and folic acid

(c) Vitamin C and protein (d) Fat and sugar

17. The main source of energy for infants is:

(a) Carbohydrates and fruits (b) Breast milk and infant formula

(c) Cereals and pulses (d) Sugar-rich snacks

18. An essential amino acid and a precursor of niacin is:

(a) Lysine (b) Histidine

(c) Tryptophan (d) Threonine

19. It combines with calcium to form an insoluble complex of calcium oxalate which cannot be absorbed:

(a) Oxalic acid (b) Malic acid

(c) Oleic acid (d) Oxaloacetic acid

20. It is considered to be the best source of iron:

(a) Red meat (b) Chicken

(c) Liver (d) Green leafy vegetables

21. Indicator of BMI :

(a) Body fat based on height and weight (b) Muscle mass only

(c) Bone density (d) Bone mineral density

22. BMR depends upon:

(a) Weight (b) Height

(c) Body surface area (d) Height and weight

23. Primary function of water in the body:

(a) Provides energy

(b) Acts as a solvent and maintains fluid balance

(c) Builds muscles

(d) Provides vitamins

24. Electrolytes help in:
(a) Regulating fluid balance and nerve-muscle function
(b) Storing energy
(c) Producing enzymes
(d) Building bones only

25. Delayed closing of the fontanelle in infants can occur due to the deficiency of:
(a) Vitamin A (b) Vitamin B
(c) Vitamin C (d) Vitamin D

26. In the last trimester of pregnancy BMR increases by:
(a) 8% (b) 10%
(c) 12 % (d) 15%

27. Factor to be considered while planning a therapeutic diet:
(a) Patient's age, disease condition, and activity level
(b) Patient's taste preference
(c) Patient's selection of food
(d) None of the above

28. Mustard seeds are commonly adulterated with:
(a) Poppy seeds (b) Chia seeds
(c) Argemone seeds (d) Sesame seeds

29. The Food Safety and Standards Authority of India (FSSAI) was established on:
(a) 5th August 2008 (b) 5th August 2007
(c) 5th August 2006 (d) 5th August 2005

30. This diet should not be continued for more than 24 to 48 hours:
(a) Clear fluid diet (b) Soft diet
(c) Full fluid diet (d) Semi-fluid diet

31. In India, a person is considered overweight if their Body Mass Index (BMI) is between:
(a) 18-22.9 kg/m2 (b) 23-24.9 kg/m2
(c) 25-26.9 kg/m2 (d) 27-28.9 kg/m2

32. Protein intake of healthy infants is about:
(a) 1.16g/kg body weight (b) 1.5gm/kg body weight
(c) 1gm/kg body weight (d) 2gm/kg body weight

33. RDA for protein for 8-month-old infant is:
(a) 8gm (b) 8.5gm
(c) 10.5gm (d) 12.5gm

34. The chief carbohydrate in milk is:
(a) Lactose (b) Galactose
(c) Glucose (d) Maltose

35. Low birth weight babies are born with birth weight less than:
(a) 2000g (b) 2200g
(c) 2500g (d) 2600g

36. For an infant, the ideal first food is:
(a) Cow's milk
(b) Breast milk
(c) Rice cereal
(d) Fruit juice

37. Energy requirements for adolescent males are:
(a) 2500 to 3000 calories
(b) 1500 to 2000 calories
(c) 1000 to 1500 calories
(d) None of the above

38. Protein-Energy Malnutrition (PEM) primarily results from:
(a) Lack of micronutrients
(b) Deficiency of proteins and calories
(c) Excess vitamin intake
(d) Overhydration

39. Kwashiorkor is a type of PEM characterized by:
(a) Edema, fatty liver, and growth retardation
(b) Marasmus-like severe wasting only
(c) Severe anemia
(d) Excess weight gain

40. Optimal weight gain during pregnancy is about:
(a) 6-8 kg
(b) 8-10 kg
(c) 11-13 kg
(d) 14-16 kg

41. Number of deaths of infants under 1 week and still-births per 1000 total births is known as:
(a) Infant mortality rate
(b) Post natal mortality rate
(c) Perinatal mortality rate
(d) Neo natal mortality rate

42. Congenital iodine deficiency syndrome is also known as:
(a) Goitre
(b) Hyperthyroidism
(c) Cretinism
(d) Myxedema

43. ICDS stand for:
(a) International Child Development Society
(b) Indian Child Development Scheme
(c) Infant Care and Development Services
(d) Integrated Child Development Services

44. The Mid-Day Meal Scheme aims to:
(a) Provide free textbooks to school students
(b) Improve nutritional status of school children and combat malnutrition
(c) Offer scholarships to school students
(d) Provide school uniform for free

45. FAO is a specialized agency of:
(a) United Nations
(b) World Bank
(c) UNESCO
(d) WHO

46.. POSHAN Abhiyaan was launched in the year:
(a) 2014
(b) 2016
(c) 2018
(d) 2020

47. PMMVY provides cash incentives to:
(a) Pregnant and lactating women for first living child
(b) All married women irrespective of pregnancy
(c) Only adolescent girls
(d) All children under 5 years

48. It encompasses all ocular manifestations of vitamin A deficiency:

(a) Keratomalacia
(b) Conjunctival xerosis
(c) Corneal xerosis
(d) Xeropthalmia

49. The accumulation of fluid in the abdomen is known as:

(a) Oedema
(b) Lymphedema
(c) Ascites
(d) Hydrocephalus

50. Pregnancy induced hypertension is also known as:

(a) Primary hypertension
(b) secondary hypertension
(c) Gestational hypertension
(d) Isolated systolic hypertension
